Top 4 NoSQL Databases

Description

One of the most popular document stores

Wide-column store based on ideas of BigTable and DynamoDB

A modern search and analytics engine based on Apache Lucene

JSON-based document store derived from CouchDB with a Memcached-compatible interface

Database model

Document store

Wide Column store

Search engine

Document store

Developer

MongoDB, Inc.

Apache Software Foundation

Elastic

Couchbase, Inc.

Release

2009

2008

2010

2011

Language

C++

Java

Java

C, C++ and Erlang

Server-side scripts

JavaScript

No

Yes

View functions in JavaScript

Replication methods

Master-slave replication

Selectable replication factor

Yes

Master-master replication,
Master-slave replication

Best use

If you need dynamic queries.
If you prefer to define indexes, not map and reduced functions. If you need good performance on a big DB and when your data changes too much

When data you need to store doesn't fit on server, but requires friendly familiar interface to it

When you have objects with flexible fields, and you need "advanced search" functionality

Any application that requires low-latency data access, high concurrency support and high availability

MongoDB

Cassandra

Elasticsearch

Couchbase
